Skills

Coding

Javascript   C#   Python   Ruby   HTML5   CSS3

Libraries/Frameworks

React   jQuery   Ruby on Rails   .NET   Express.js   Bootstrap   Sass

Database

PostgreSQL   MongoDB

Experience

General Assembly / Software Engineering Student
AUGUST 2020 - NOVEMBER 2020, REMOTE

Countlories - A collaborative project with two other students utilizing React, Sass, and Framer Motion on the front-end. Meanwhile, the back-end was created using Express.js and MongoDB as the database. *Countlories* is a simple calorie tracking application where the user can input what they have eaten, how many calories it was, and make any changes to any foods they have eaten that week.

JoeBot - Utilized Discord's API to create a Discord Bot mimicking one of my favorite instructors at General Assembly. *JoeBot* was written using Python and comes with joke commands as well as educational commands.

In Vision Boston / Optometric Assistant
JUNE 2012 - MARCH 2020, MALDEN, MA

Performed delicate optical procedures such as auto refractometer and tonometry daily to ensure patients received the best results for their visual needs.

Provided over 15+ patients daily with the most optimal options for lenses to match their requested needs and prescription.

Education

General Assembly / Certificate of Completion
AUGUST 2020 - NOVEMBER 2020, REMOTE

450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.
