Boston, MA | 781-502-6486 | jakenguyen0118@gmail.com | https://jakenewyen.com/

SUMMARY

A fast-learning software engineer who can solve everyday problems with creativity and provide a different perspective to everyday problems. Keen eye for simple yet gorgeously crafted designs.

SKILLS

- ReactJS, JavaScript, Ruby on Rails, Python, PostgreSQL, REST API, Sass, Express, MongoDB, Node.js, Git/GitHub, Bootstrap

PROFESSIONAL EXPERIENCE

AUG 2020 - NOV 2020

General Assembly, *Software Engineering Immersive Student*, Boston, MA

- Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.
- **Countlories** - *ReactJS, Javascript, Sass, MongoDB, Express, Mongoose* - A calorie tracking application created with React and utilized other libraries on the frontend. The backend was implemented using Express, Mongoose, and MongoDB.
- **JoeBot** - *Python, Discord API* - A bot for the popular voice and chat service Discord. The bot was modeled after my *General Assembly* instructor Joe Koehan. JoeBot has various commands to request for lecture notes and other resources to learn new skills.
- **TUNR** - *Ruby on Rails, ReactJS, Javascript, Sass* - A full-stack playlist application where users can add any songs they desire to their playlist. Comes with a favorites button to allow users to favorite a song they have added to a playlist. Users can remove or edit their songs at any time.

JUN 2012 - MAR 2020

In Vision Boston, *Optometric Assistant*, Malden, MA

- Performed delicate optical procedures such as auto refractometer and tonometry daily to ensure patients received the best results for their visual needs.
- Provided over 15+ patients daily with the most optimal options for lenses to match their requested needs and prescription.

EDUCATION

AUG 2020 - NOV 2020

General Assembly, Boston, MA

Software Engineering Immersive Remote Graduate
